Project Title

Responsive Personal Portfolio Website – A modern and fully responsive website to showcase profile, education, skills, projects, and contact details.

Objective

The objective of this project is to build a professional portfolio website that represents my academic background, technical skills, and project work in a responsive and user-friendly design.

Project Description

This portfolio website acts as my personal digital profile. It includes multiple sections such as:

- Home – Introduction and overview
 - Education – Academic details
 - Skills – Technical skills
 - Projects – Project showcase with GitHub links
 - Contact – Social media and contact details
-

Features

- Fully responsive design and Fixed navigation bar
- Smooth scrolling (Education section)
- Profile image display
- Education cards layout
- Skills grid layout
- Project cards with GitHub links
- Social media icons

Technologies Used

Technology	Purpose
HTML5	Structure
CSS3	Styling
JavaScript	Interactivity
Font Awesome Icons	
Google Fonts	Typography
GitHub Pages	Hosting

Project Structure

Portfolio-Website/

SCREENSHOTS

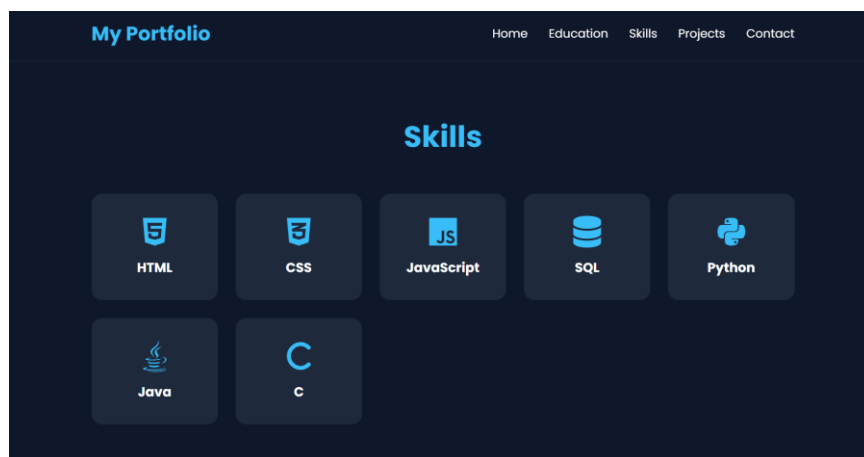

1. Home Section

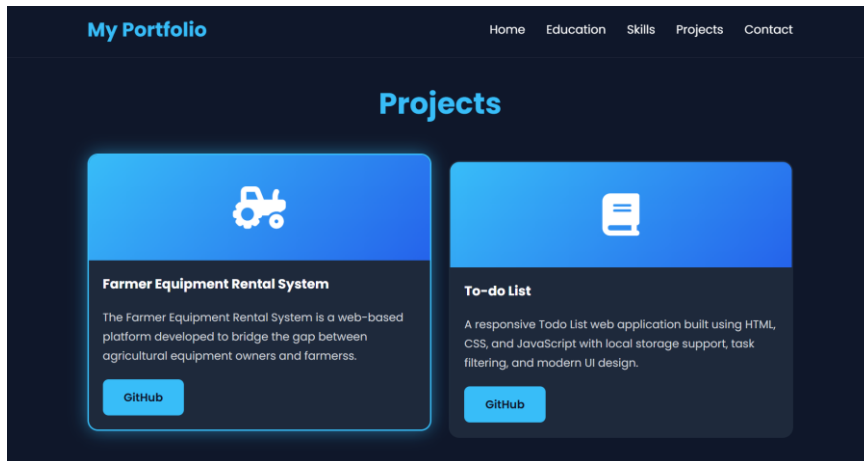

2. Education Section

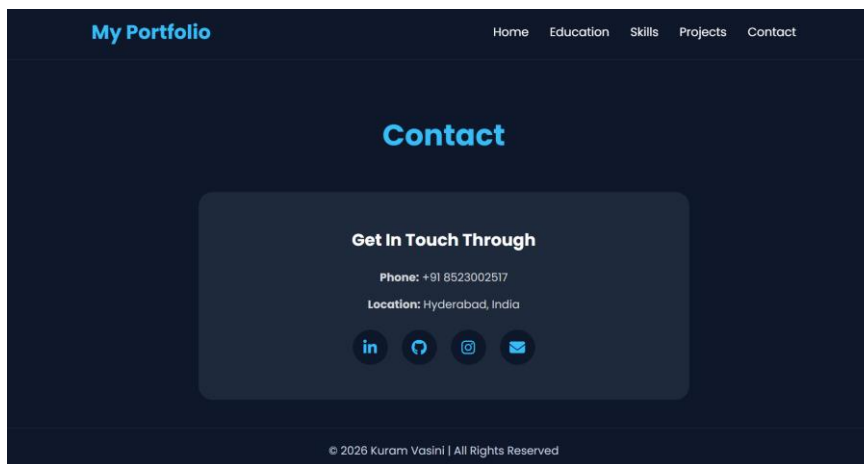

3. Skills Section

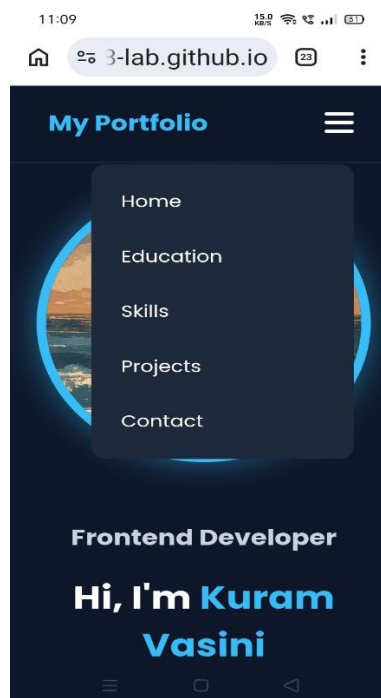

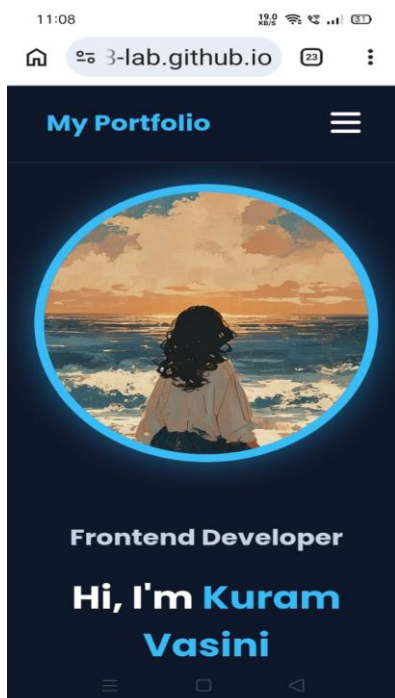

4. Projects Section

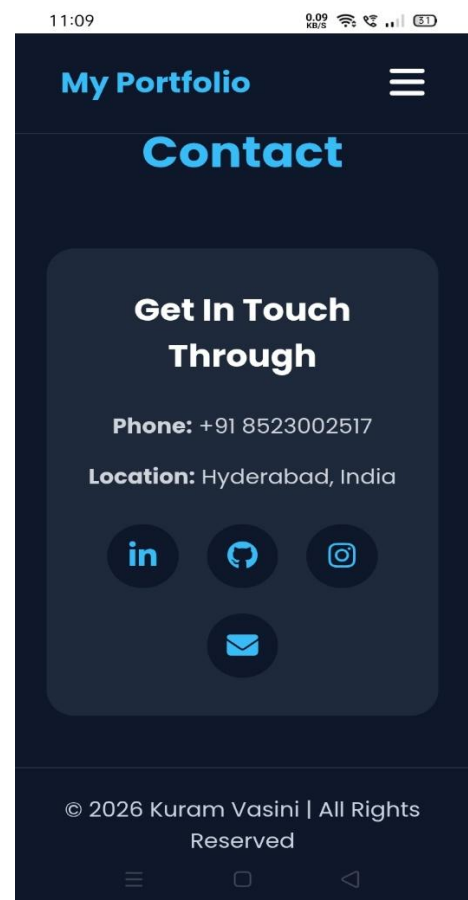

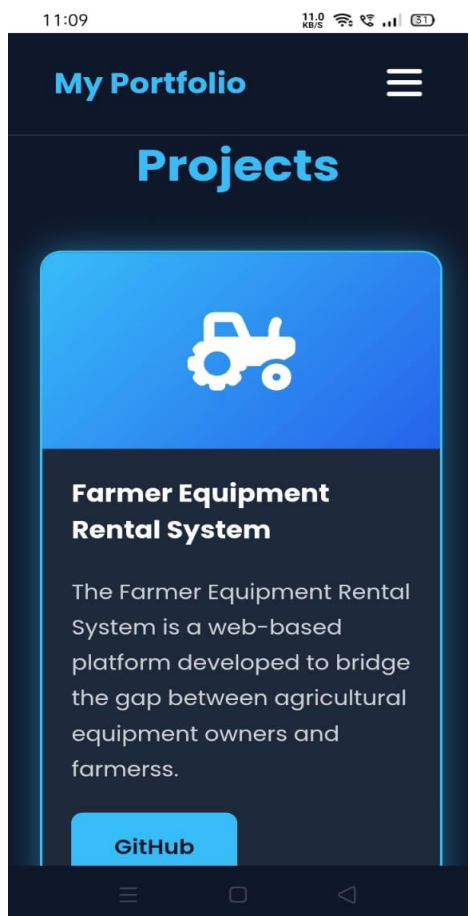

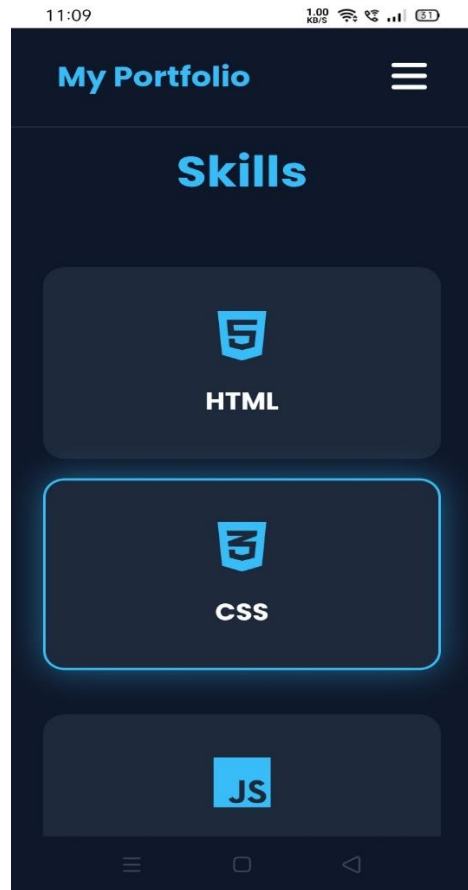

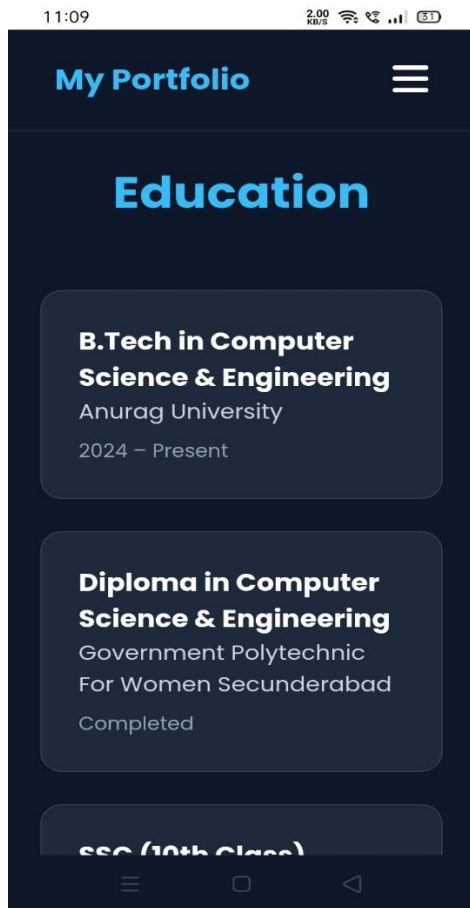

5. Contact Section

6. Mobile Responsive View

CODE SNIPPETS

1. Navigation Bar (HTML)

```
<nav>
  <a href="#home">Home</a>
  <a href="#education">Education</a>
  <a href="#skills">Skills</a>
  <a href="#projects">Projects</a>
  <a href="#contact">Contact</a>
</nav>
```

Description:

Creates navigation links for all sections of the website.

2. Home Section (HTML)

```
<section id="home">
  <h1>Hi, I'm Kuram Vasini</h1>
</section>
```

Description:

Displays introduction with name and role.

3. Education Section (HTML)

```
<section id="education">
  <div class="education-card">
    <h3>B.Tech CSE</h3>
  </div>
</section>
```

Description:

Shows academic details in card format.

4. Projects Section (HTML)

```
<div class="project-card">
  <h3>Farmer Equipment Rental System</h3>
  <a href="#">GitHub</a>
</div>
```

Description:

Displays project title and GitHub link.

5. Social Icons (HTML)

```
<div class="social-icons">  
  <a href="#"><i class="fa-brands fa-github"></i></a>  
</div>
```

Description:

Creates clickable social media icons.

6. Menu Toggle (JavaScript)

```
menuBtn.addEventListener('click', () => {  
  navbar.classList.toggle('active');  
});
```

Description:

Used for opening and closing menu in mobile view.

7. Smooth Scrolling (CSS)

```
html {  
  scroll-behavior: smooth;  
}
```

Description:

Enables smooth scrolling effect.

Commands Used

- Files uploaded manually using GitHub
 - No Git commands used
-

GitHub Repository

<https://github.com/kuramvasini8-lab/Alfido-Tech-Internship-Task1>

Live Website

<https://kuramvasini8-lab.github.io/Alfido-Tech-Internship-Task1/>

Deployment Process

1. Created a public repository on GitHub.
 2. Uploaded all project files.
 3. Committed and pushed the files manually.
 4. Enabled GitHub Pages from Settings → Pages.
 5. Selected the main branch and root folder as the publishing source.
 6. Obtained the live website URL after deployment.
-

Testing

Website Tested on:

- Google Chrome
- Microsoft Edge
- Mobile responsive mode

Result: Website was verified to be Fully responsive and working correctly.

Learning Outcomes

- Learned how to build a Responsive web design
- Improved understanding of navigation bars, layouts, and styling.
- Learned GitHub deployment.
- Implemented animations and hover effects using CSS.

Conclusion

The Responsive Portfolio Website was successfully developed using HTML5, CSS3, and JavaScript. It provides a professional platform to showcase my profile, education, skills, projects, and contact information. The website is fully responsive and works smoothly across different devices and screen sizes. This project enhanced my frontend development skills and provided practical experience in website deployment using GitHub Pages.

Declaration

I hereby declare that this project was developed by me, **Kuram Vasini**, as part of the **Frontend Developer Internship at Alfido Tech**. The work presented in this project is my own effort and has been developed for learning and internship purposes.
